Klamath Falls, OR

Summary

Seasoned Senior Software Engineer with hands-on experience. Most recently focused on Java and enterprise application development. Renowned for architecting and delivering scalable, high-performance solutions that drive business success. Adept at navigating the full software development lifecycle—from initial concept through deployment and optimization—with a proven track record of leading mission-critical projects and mentoring cross-functional teams. Combines deep technical expertise with strategic thinking and a relentless drive for innovation and excellence.

Technical Skills

- **Languages:** Java (J2EE, JDBC, JSP, Applet, Servlet, Applications) Versions 1.0 to 17, SQL
- **Web Page Skills:** HTML, CSS, Java Script
- **Java servers:** JBoss, Tom Cat
- **Source control:** VSC, GIT
- **Development tools:** Eclipse, Visual Studio, Net Beans
- **Frameworks:** Prime Faces
- **Databases:** SQL Server, Progress
- **Tools:** Jenkins, Maven, Azure, CI/CD pipelines, Salesforce
- **Methodologies:** Agile, Scrum, DevOps
- **Other:** REST, SOAP APIs (both creating services and calling other services)

Professional Experience

Senior Software Engineer JELD-WEN Klamath Falls, OR. 2003 – 2025

- Architected and developed enterprise-grade Java applications supporting manufacturing operations across 20+ facilities.
- Managed the end-to-end software development lifecycle, including requirements gathering, design, development, testing, and deployment.
- Integrated Jenkins-based CI/CD pipelines, accelerating deployment cycles from weekly to daily.
- Collaborated with business stakeholders to define technical requirements and deliver scalable solutions.
- Authored technical documentation and API specs used across multiple departments.
- JELD-WEN makes Windows and Doors and sells them to stores such as Home Depot,

Lowe's etc. Recent projects:

- Sales Structure Maintenance: Web Application to manage sales representative hierarchy structure, and assign 20K+ stores to a windows rep, and a door rep. Easy to use, one person deals with all US stores, while another deals with Canada stores.
- Customer Data Manager: Web Application to create and update customers (stores) , including product offering.
- Sales Manager Toolbox: Report that sales representatives (400+) and their managers can use to see sales \$, and projected forecast, which drive commissions.
- Salesforce Integration: Salesforce is a cloud-based Customer Relationship Management tool. This integration application has a scheduler that automatically reads data from multiple sources including SQL Server, Progress DB, REST and SOAP API's and updates Salesforce. Also has REST and SOAP API's for other applications to call to get data from Salesforce.

Prior experience:

- 1996 – 2002 ING North America Insurance Corporation. Portland Oregon. Senior Software Engineer
